

Group Leader on the road

I was on a road trip with my wife in the USA recently and I only saw one Triumph Spitfire on the road but it was travelling too fast to get a picture but I did manage to catch an American classic car show one Sunday Afternoon in Jackson Hole, Wyoming. Recognise the format of the stereotype field show.

Of course I had to drag the wife around to see what was there

There were over 100 vehicles including originals but also custom fancy wagons but there are just two that took my fancy, both Chevy's,

1969 Chevrolet Chevelle SS 415BHP

Polished to perfection in the engine bay area

Then there was the 1955 Chevrolet – bit of an upgraded one!! I could have taken this one home but could not afford to pay the airline fee for overweight luggage.

Nearly jumped in and had a test drive

This 525 BHP Chevy engine looked like it had never been used. The interior was rather sumptuous as well

There was Butch Cassidy and the Sundance kid sitting around discussing their getaway vehicles and they were very happy to tell us all about their cars. What was Terry Hill doing sitting at the back?

And finally Rosemarie preferred something with a bit more wood
